In September 2011 Dr. Jian Zhang and his wife Weiwei Chu donated a $1000 gift to ARMA lab to support education and research activities and to encourage outstanding graduate students who exhibit outstanding academic achievement during their academic career.

In 2010 Dr. Jian graduated from ARMA earning a Ph.D. degree with distinction. His Ph.D. research area focused on the design of steerable electrode arrays and methods of electrode insertion for Cochlear Implant Surgery. He has published several journal papers and conference papers in the area and helped strengthen ARMA's lead in medical robotics. He joined Intuitive Surgical in 2010 after his graduation. He is responsible for developing new medical robotics technologies for future ISI products.

Dr. Jian's success and generosity in giving back to ARMA set a wonderful precedent towards
